

Dry Shade Gardening

Eunice Shonk, one of our own Stark members, will help us discover ways to grow happy plants under the most difficult circumstances – dry shade. Her talk will include identification of dry shade areas and planting techniques, with plant lists and pictures of perennials, ground covers, ferns, grasses and woodies that can thrive in dry shade.

Eunice Shonk

Eunice has been a Master Gardener Volunteer in Stark County since its inception in 2004. She has been active in the Speakers' Bureau and acted as its chairperson for many years. She has played important roles in the leadership and development of the organization, lending her expertise and skills toward the growth of the club. And if you have ever been to her garden, you know that she loves her plants. She gardens in all conditions, sun to shade, wet to dry, and everything in between!
